ARTS, AUDIO/VIDEO TECHNOLOGY & COMMUNICATIONS: FUNCTION – PHOTOGRAPHY/

DIGITAL IMAGING

James Gipe P'18

Owner

Self/Pivot Media, Inc.

James Gipe P'18 is a photographer, digital imaging consultant, and owner of Pivot Media, a specialized imaging company in Western Massachusetts. Mr. Gipe first picked up a camera in 1984, while studying music at the University of Northern Colorado. This experience led to a B.A. in photojournalism two years later. During the next ten years, Mr. Gipe honed his camera and darkroom skills in Western Massachusetts, working as a photojournalist and freelance photographer. In 1994, his curiosity about computer imaging led him to purchase an early version of Adobe Photoshop. The digital darkroom transformed Mr. Gipe's creative process, leading to assignment work that merged his photographic skills with his new-found passion for digital illustration. In 1998, Mr. Gipe purchased a Scitex film scanner that allowed him to create high resolution film scans. To help make the scanner's loan payments, Mr. Gipe began offering scanning services to the local photo and art community. What was meant to be a side project quickly turned into a full-time job and in 1999, with his first museum contract in hand, Mr. Gipe founded Pivot Media, a photography and digital imaging studio dedicated to the digitization of picture and art collections. Since then, working for individuals and institutions, museums and archives, Mr. Gipe has digitally photographed thousands of art objects ranging from ancient Egyptian pottery and Roman coins to an Andy Warhol Polaroid collection. He's digitized the business ledger of an 18th century clockmaker, Sylvia Plath's diaries, and Virginia Woolf's family photo album. Through his work with the Eric Carle Museum of Picture Book Art, Mr. Gipe has digitized the original artwork for Charlotte's Web, The Very Hungry Caterpillar, and Madeleine to name a few.

HUMAN SERVICES: FUNCTION – TRAINING / DEVELOPMENT

Ellen Butowsky P'16

Associate Director Training & Staff Development

Prevent Child Abuse New York

Recruiting: possible internships in community outreach around child abuse prevention, and not for profit management and fundraising

Ellen Butowsky P'16 has served as the associate director of training and staff development for Prevent Child Abuse New York for the past eight years. PCANY provides advocacy, training, education, and referral services with the goal of stopping child abuse before it has a chance to start. Her work takes her throughout New York State providing Healthy Families NY home visiting programs with training, technical assistance, coaching, and skill building necessary for them to provide high quality services to vulnerable new and expectant families. She is also the managing editor of *The Link*, the statewide publication for Healthy Families NY. For 10 years, Ms. Butowsky was the director of community services for the Mid-Hudson Family Health Institute, overseeing its home visiting programs. This included building community partnerships, advocating at the national and local level, grant writing, supervising staff, and working directly with participant families in their homes and in a group setting. Ms. Butowsky helped initiate a nationally recognized random control trial; this research helped justify continued funding for much needed preventive services for vulnerable children and families. In other positions, Ms. Butowsky has worked with migrant farmworkers, people living with HIV/AIDS, and homeless families. She served in the U.S. Peace Corps in southern Honduras for three years working in rural villages. She assisted women's groups with cashew producing projects, and health and nutrition activities. Ms. Butowsky holds dual master's degrees from UNC-Chapel Hill in public health and social work, with a focus on maternal and child health. She is very excited to share her experiences and passion with anyone interested in this work.

**SCIENCE, TECHNOLOGY, ENGINEERING & MATHEMATICS: FUNCTION- ORGANIC
CHEMISTRY****Benjamin Bechand '14***Laboratory Technician*Albany Molecular Research: <http://www.amrismartsourcing.com/>

Benjamin Bechand graduated from Skidmore in 2014 with a double major in biology and Asian studies. After graduation, he was hired as an introductory organic chemist at Albany Molecular Research Incorporated. He works in chemical development where he helps design processes to synthesize compounds for later manufacturing. Every day, he performs large-scale synthesis reactions and is always problem solving to try and improve the chemistry. His biology major supplemented with chemistry courses helped him get this position because pharmaceutical companies look to recruit researchers who can walk between the worlds of biology and chemistry and who have strong laboratory skills. His Skidmore biology major has helped him because he works in a lab where problems/roadblocks are the norm, and problem solving and creative thought are required skills. The SEE-BEYOND award in biology gave him valuable research experience which prepared him for the responsibilities of working in this kind of lab. He is one of several Skidmore students AMRI has recruited for chemist and internship positions. Currently he is working on a master's in organic chemistry at SUNY Albany, paid for by AMRI.
