

Campus Sustainability Plan

Annual Assessment Visual Report

Fiscal Year 2023 (FY23)

Skidmore College

Developed by the Sustainability Office

Reviewed by the Campus Sustainability Subcommittee on March 27, 2024

The *Campus Sustainability Plan (CSP)*, developed in 2015 by the Campus Sustainability Subcommittee (CSS) of the Institutional Policy and Planning Committee, provided a thorough review of the progress that Skidmore had made in its campus sustainability efforts and offered goals in five key focus areas - **energy, waste, food, lands and grounds, and engagement** - to help Skidmore practice and create sustainability solutions.

Goals for 2025

Goal 1: 60% of our electricity from renewable sources

- Currently 45% of our electricity from renewable sources

Goal 2: 60% of our heating and cooling from renewable sources

- Currently 40% of heating and cooling from renewable sources

Goal 3: 75% reduction in our GHG emissions

- Currently 48% reduction in GHG emissions

Goal 4: 60% reduction in energy use for heating and cooling per student and square foot

- Currently 50% reduction in energy use for heating and cooling per student and square foot

Goal 5: Maintain electricity use per student and square foot

Goal: 25% Sustainable Food in Dining Services

- Currently 11% Sustainable Food in Dining Services

Goal 1: 60% diversion rate in routine operations

- Currently 27% diversion rate in routine operations

Goal 2: 50% diversion rate for special projects

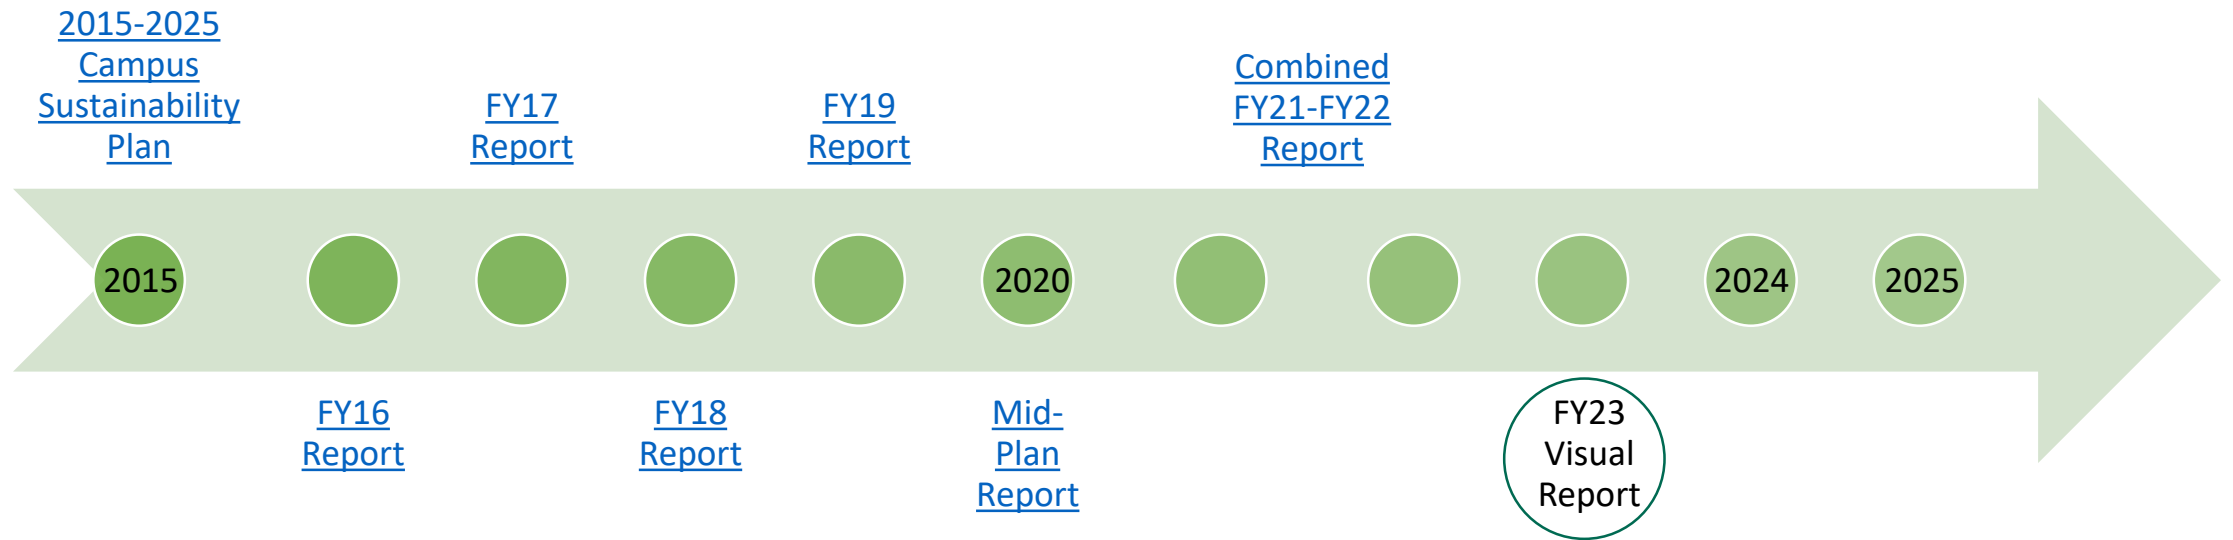

Goal: Create a comprehensive lands management plan for our lands and grounds

Goal: Make sustainability an essential feature of Skidmore's identity and a value that is integrated into all aspects of the College

CSP Assessment and Reporting

“Pathways” (in the report) – ideas and options for strategic projects, actions, and initiatives that could help Skidmore make progress toward the goals

Skidmore Campus Sustainability Plan (2015-2025) By The Numbers

ENERGY

▲ 2015 ■ 2023 Status ■ Goal Gap

60% of our electricity from renewable sources

60% of our heating and cooling (by square foot) from renewable sources

75% reduction in our Scope 1 and 2 GHG emissions

60% reduction in energy use (natural gas) for heating and cooling per student and square foot (2000 baseline)

0% Maintain electricity use per student and square foot (2000 baseline, 0% is the goal/maintenance level)

+10%

-4%

FOOD

25% sustainable food in dining services

WASTE

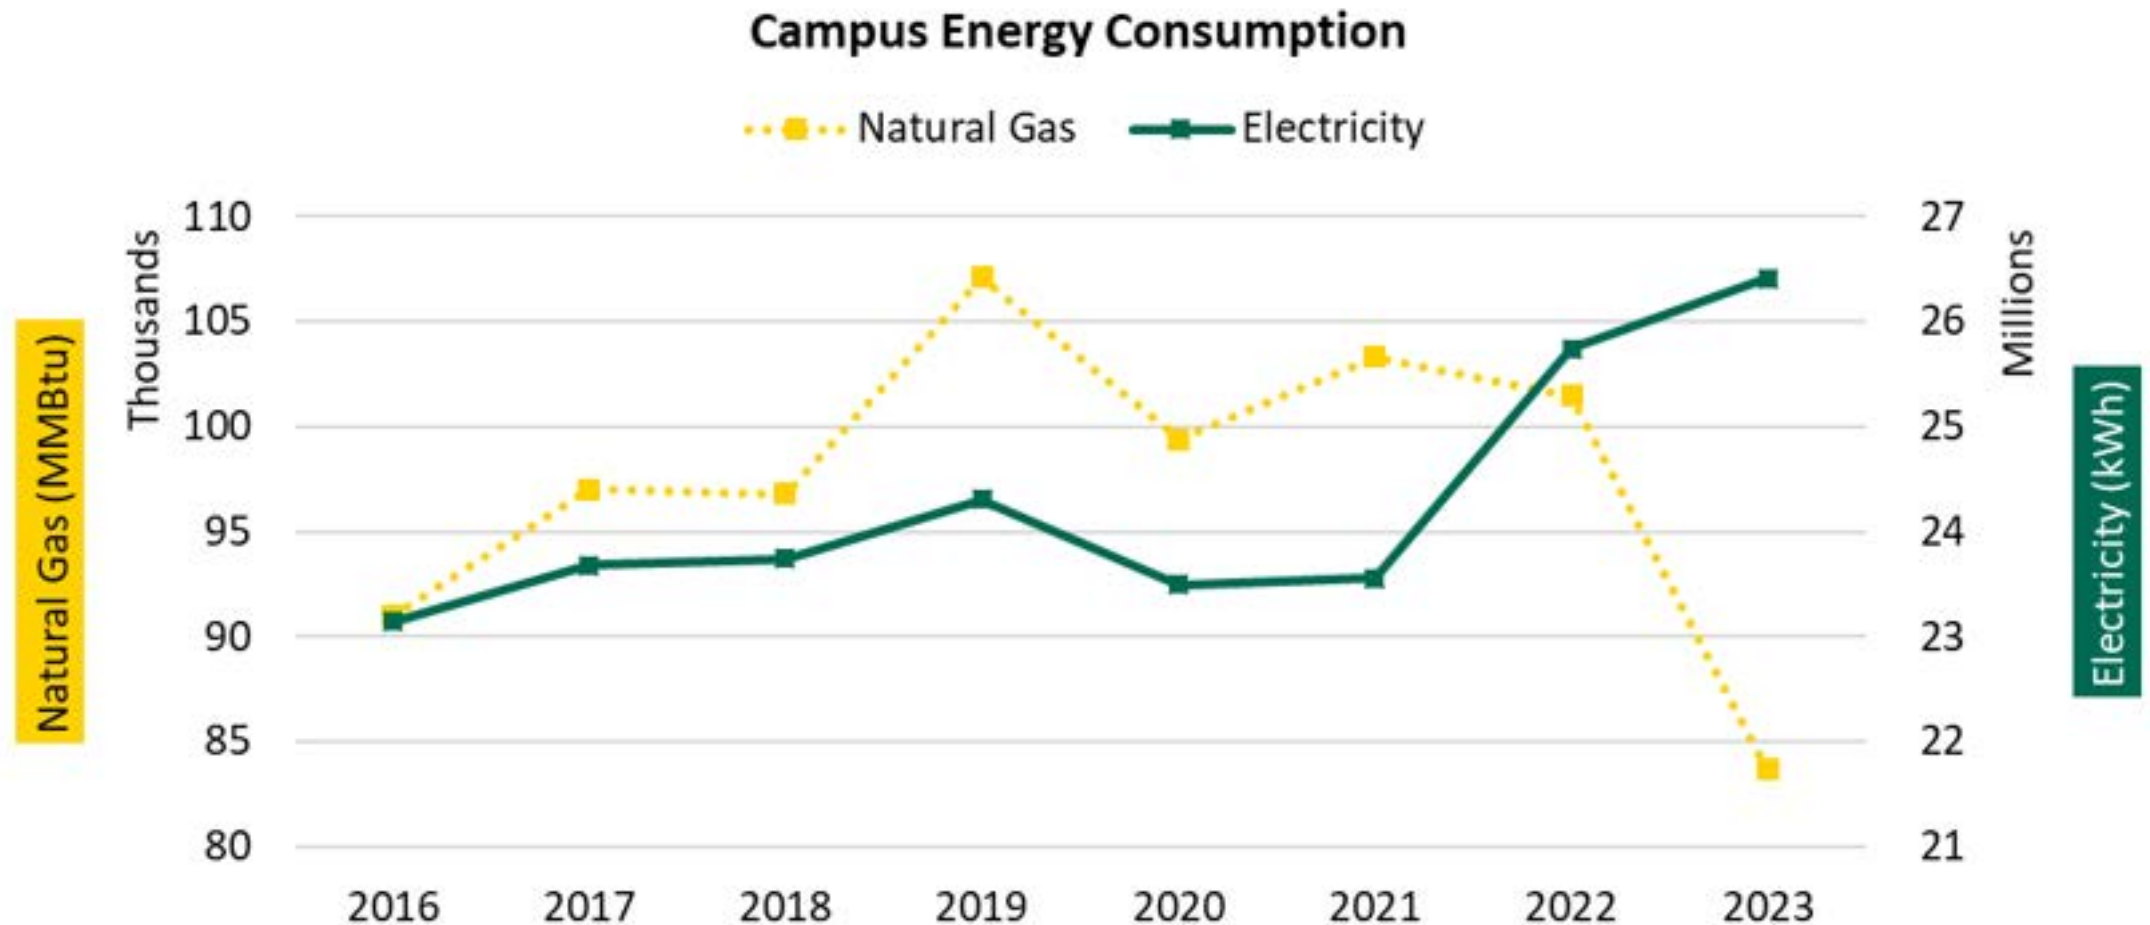

60% diversion rate in routine operations

50% diversion rate for special projects

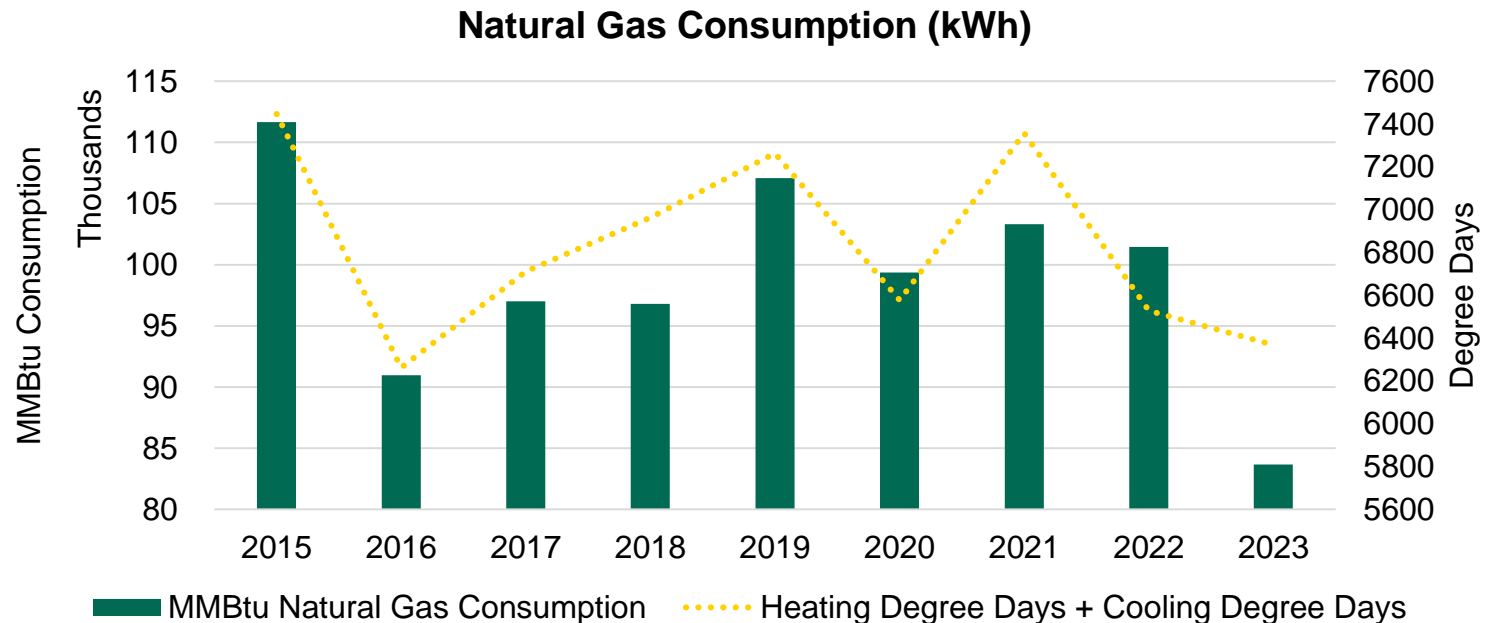

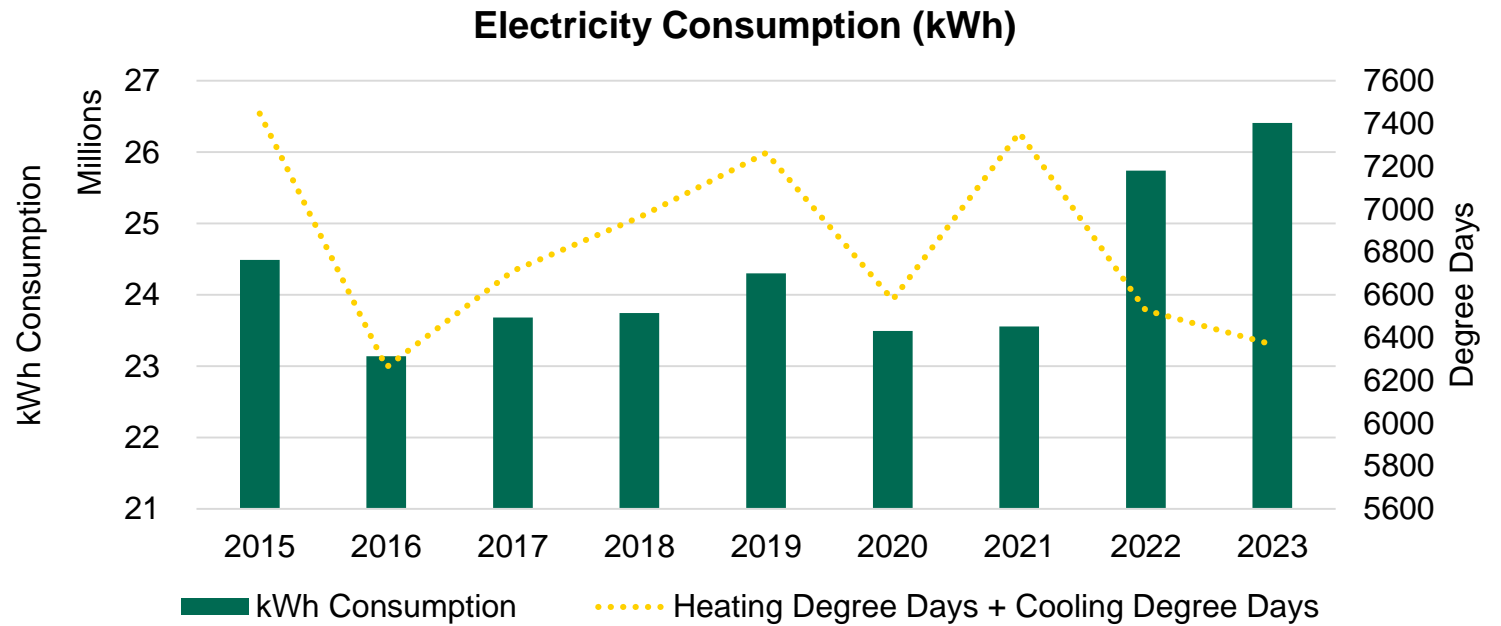

most projects landfilled and untracked

Energy: Primary Sources

Energy: Degree Days (weather impacts)

Major variables impacting consumption include building square foot changes, building electrification/HVAC system changes, and COVID-19 (e.g., residency and ventilation)

Energy Goal 1: 60% renewable electricity

FY23: 18%

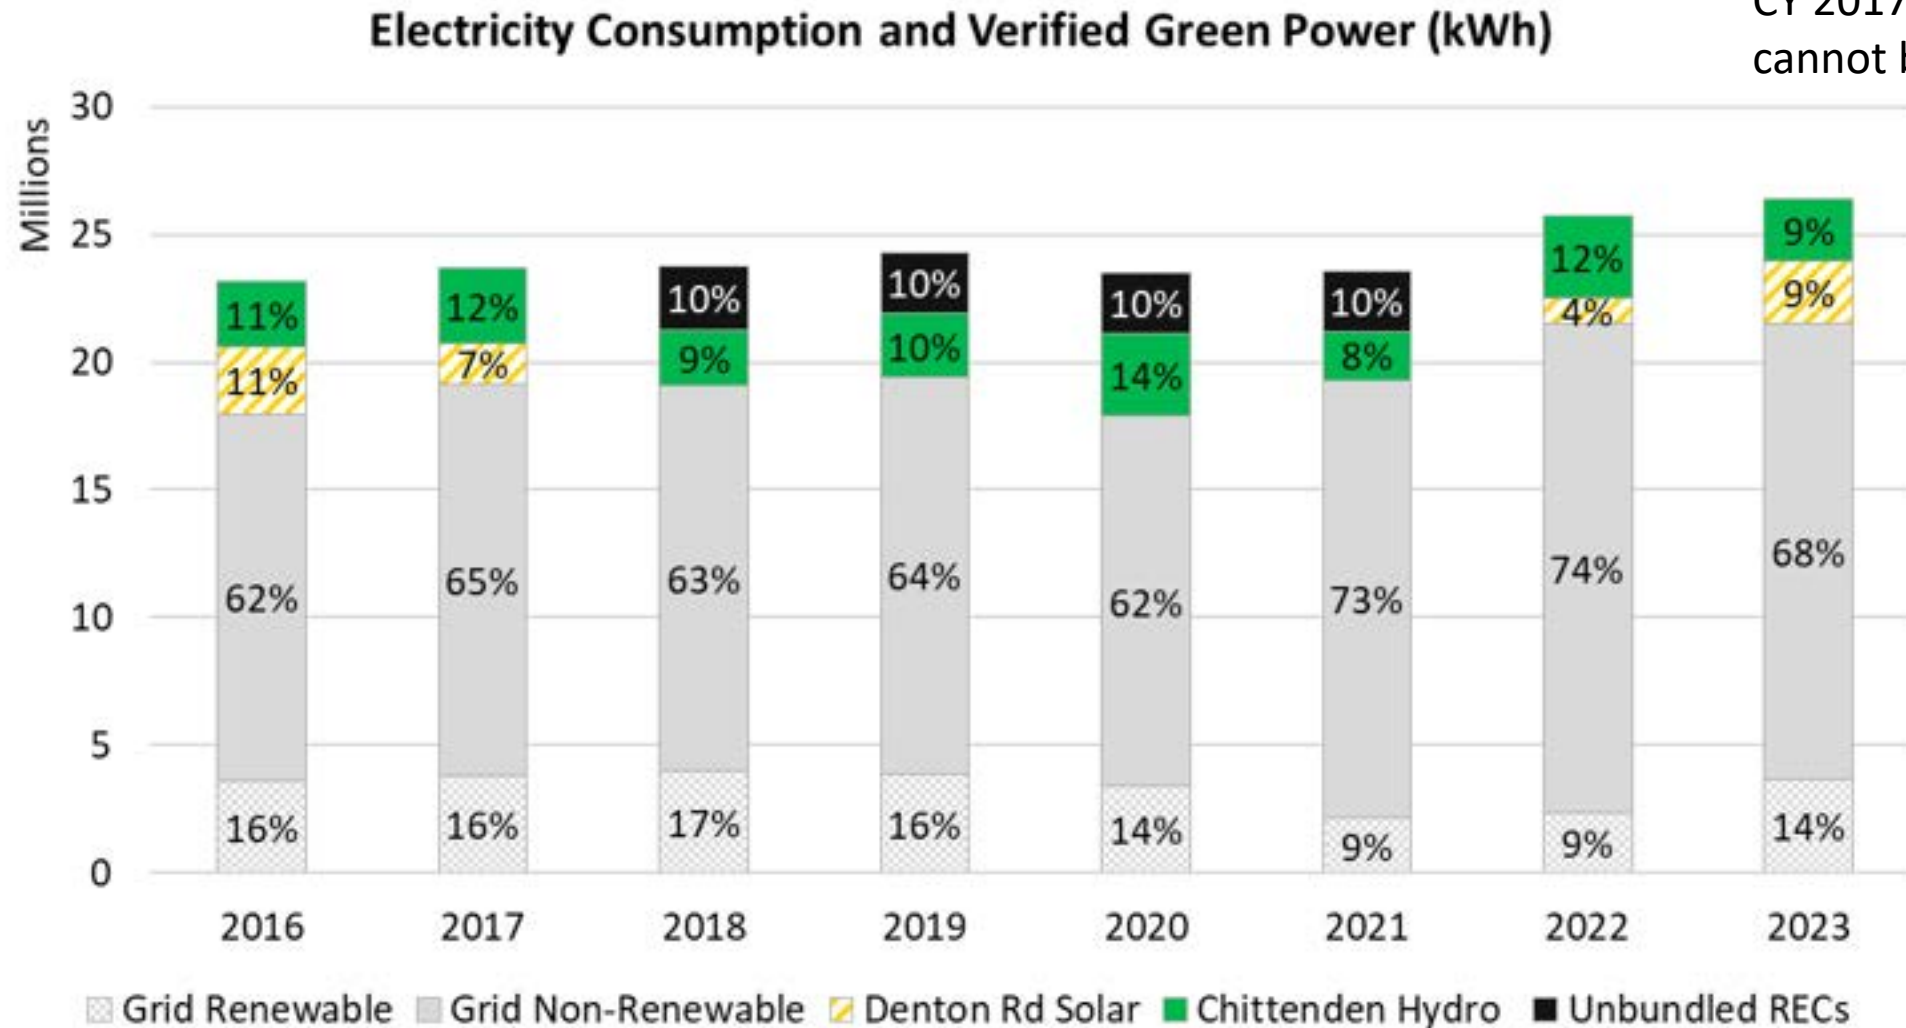

Pathways: power purchase agreement (PPA), utility green pricing/contracts, unbundled renewable energy credits (RECs)

Energy Goal 1: 60% renewable electricity

FY23: 18%

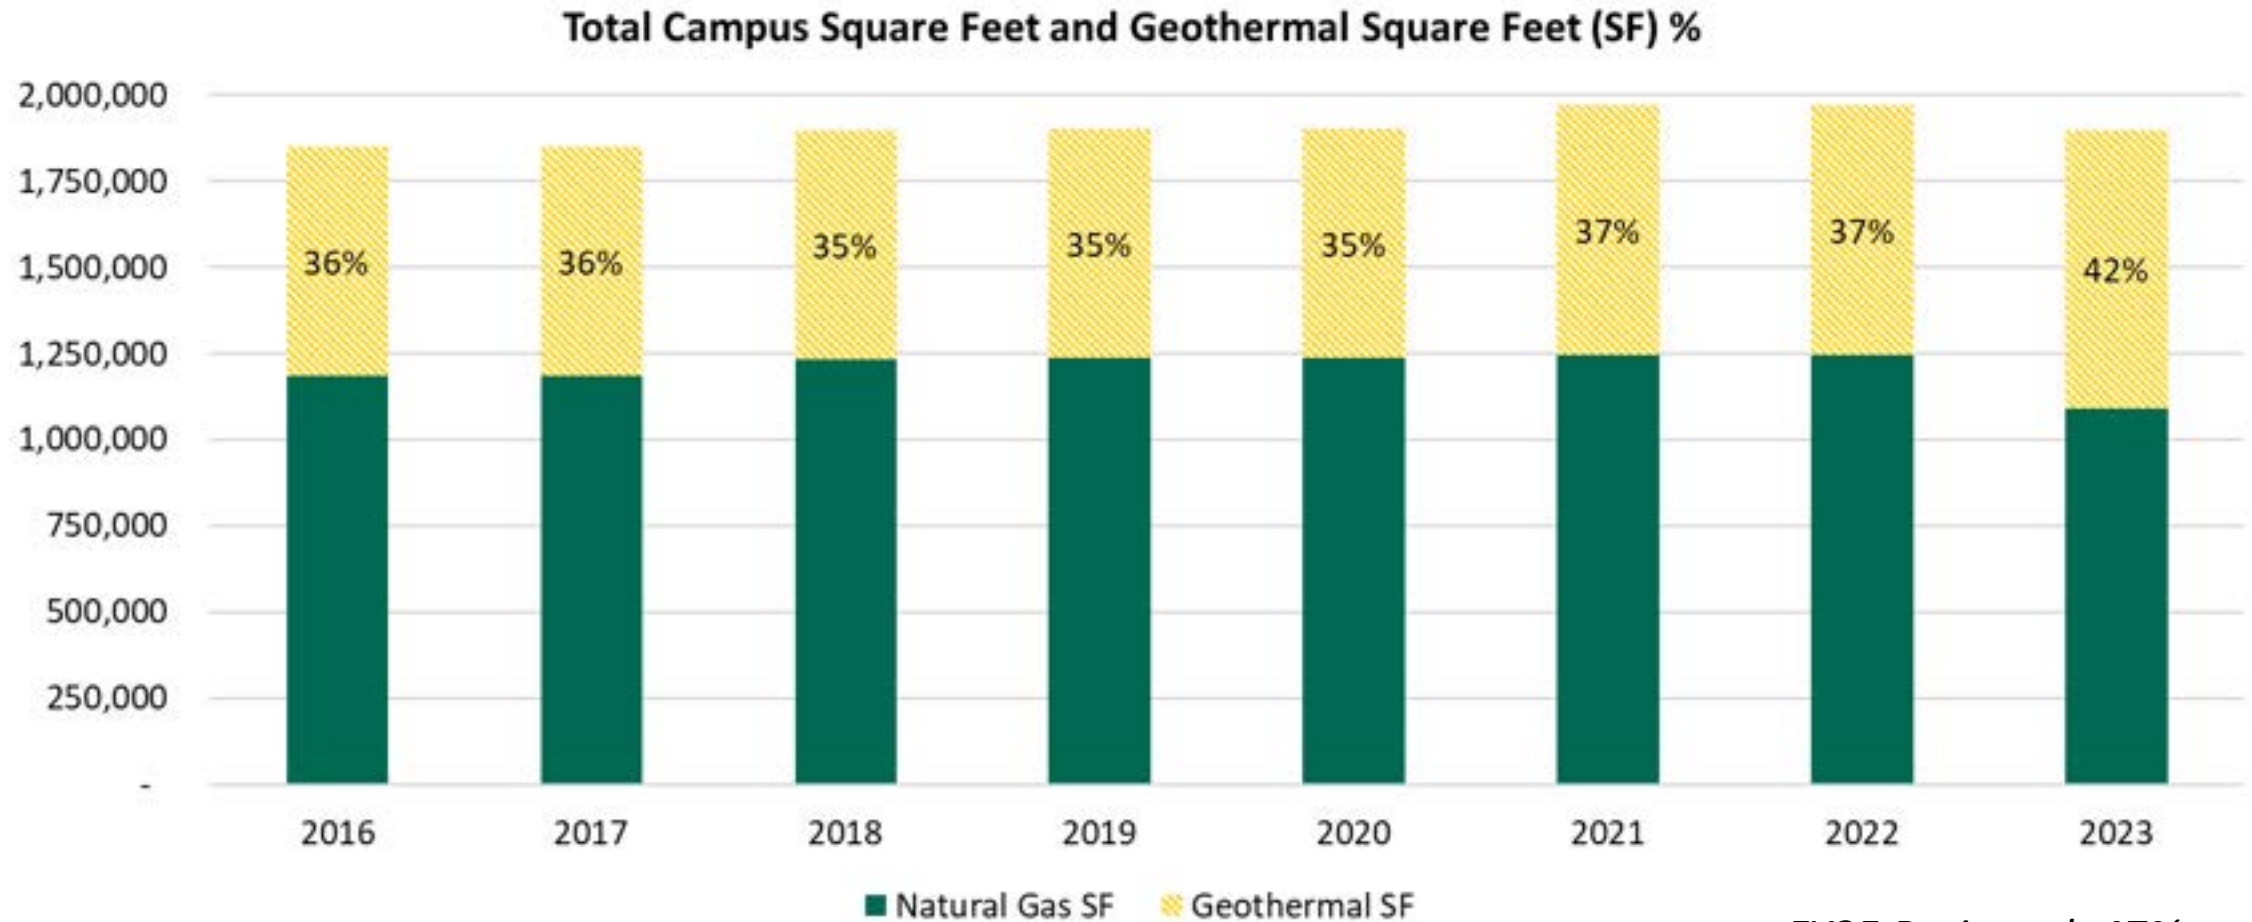

Solar RECs were not retained and retired for CY 2017-2021 (thus cannot be claimed)

Energy Goal 2: 60% renewable heating and cooling

FY23: 42% (building footprint covered by geothermal)

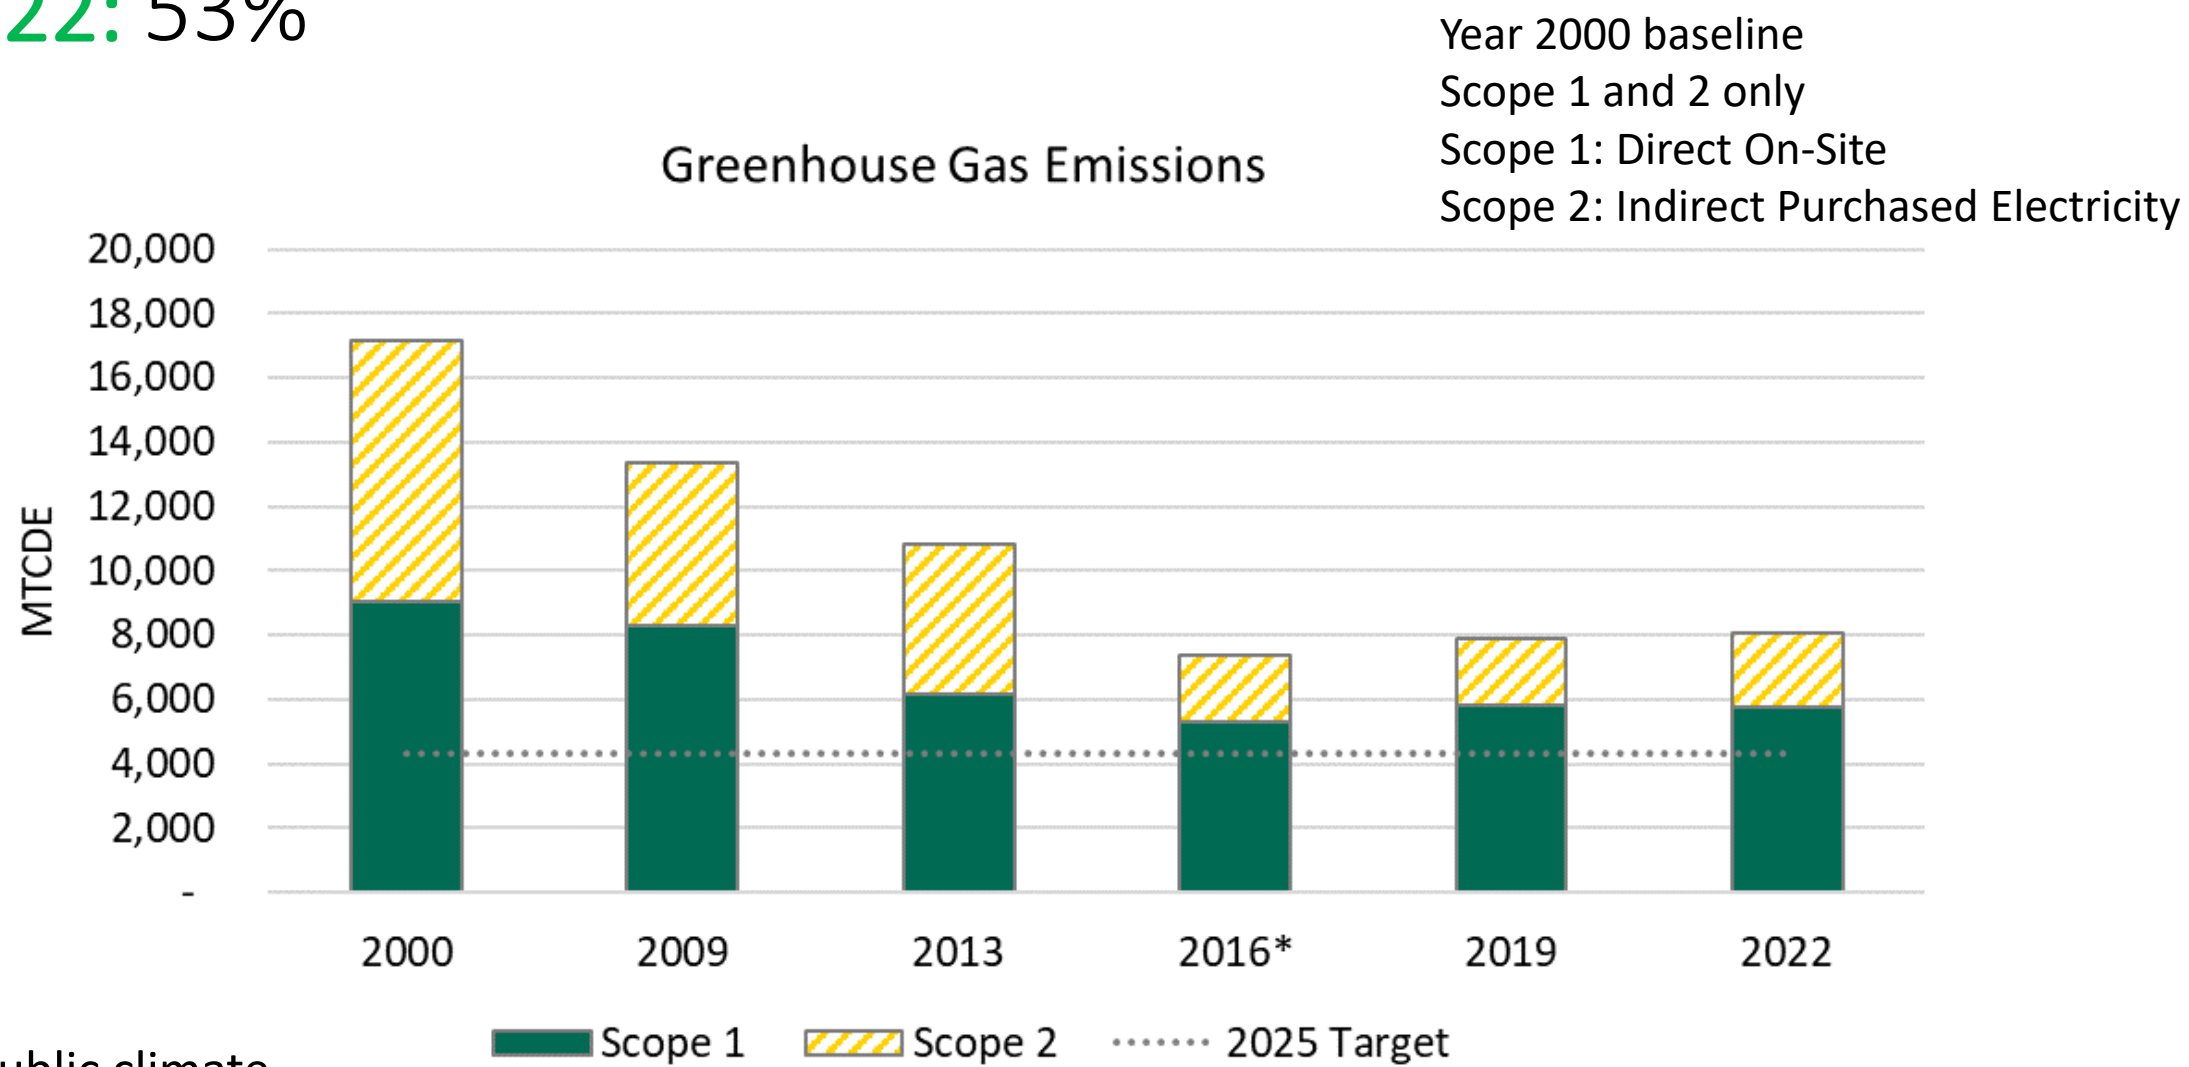

Pathways: geothermal conversion plan

FY25 Projected: 47%

Energy Goal 3: 75% reduction in our GHG emissions

FY22: 53%

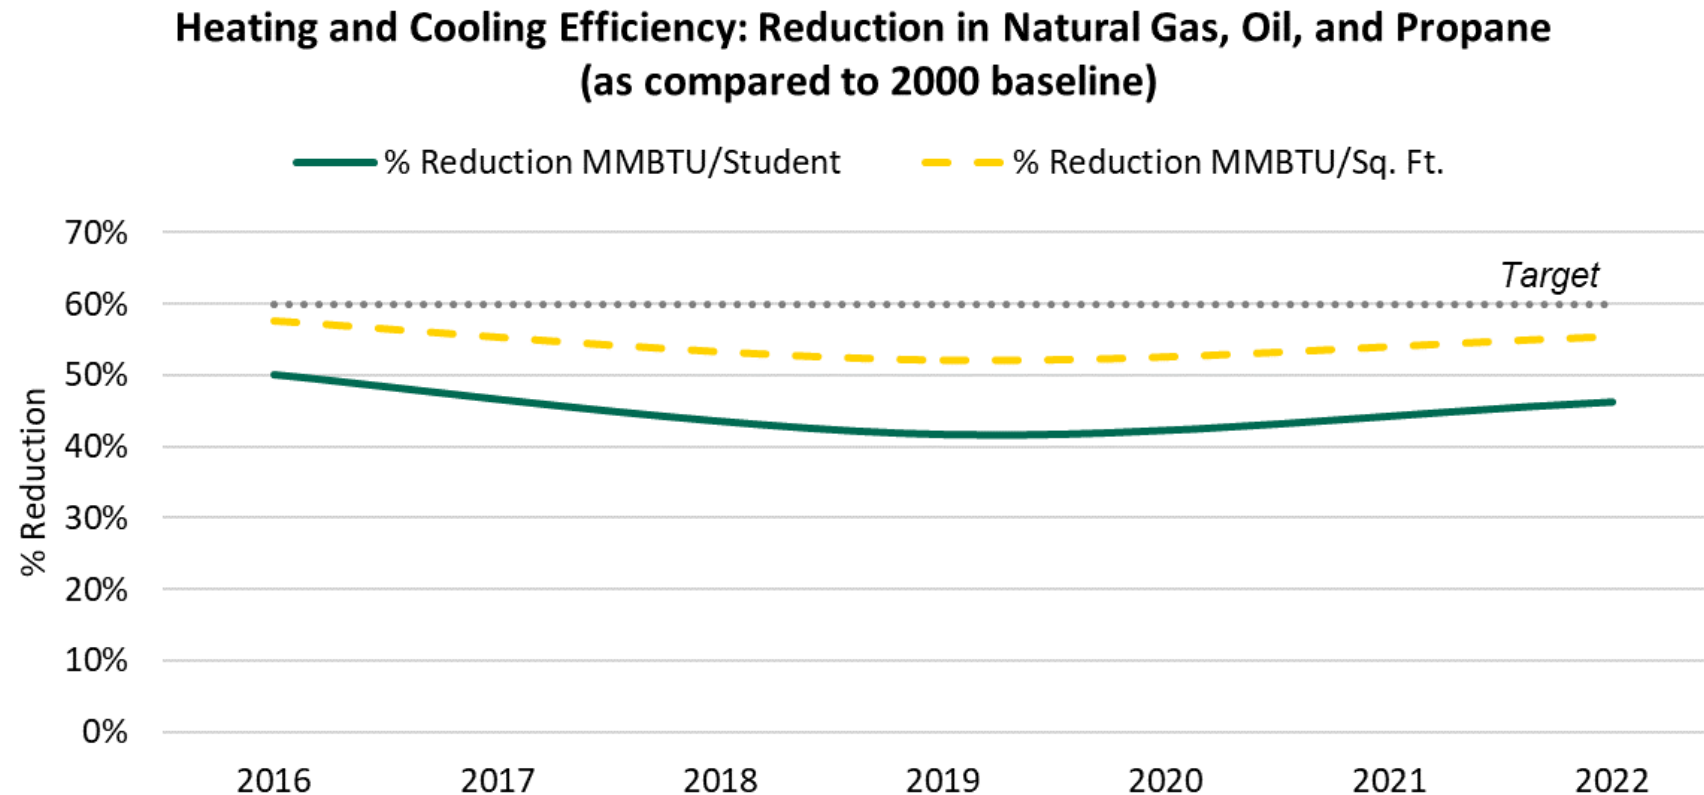

Pathways: public climate commitment and climate action/ decarbonization planning

*Drop in 2016 Scope 2 emissions is primarily due to a GHG inventory methodology change

Energy Goal 4: 60% reduction in energy use for heating and cooling per student and square foot

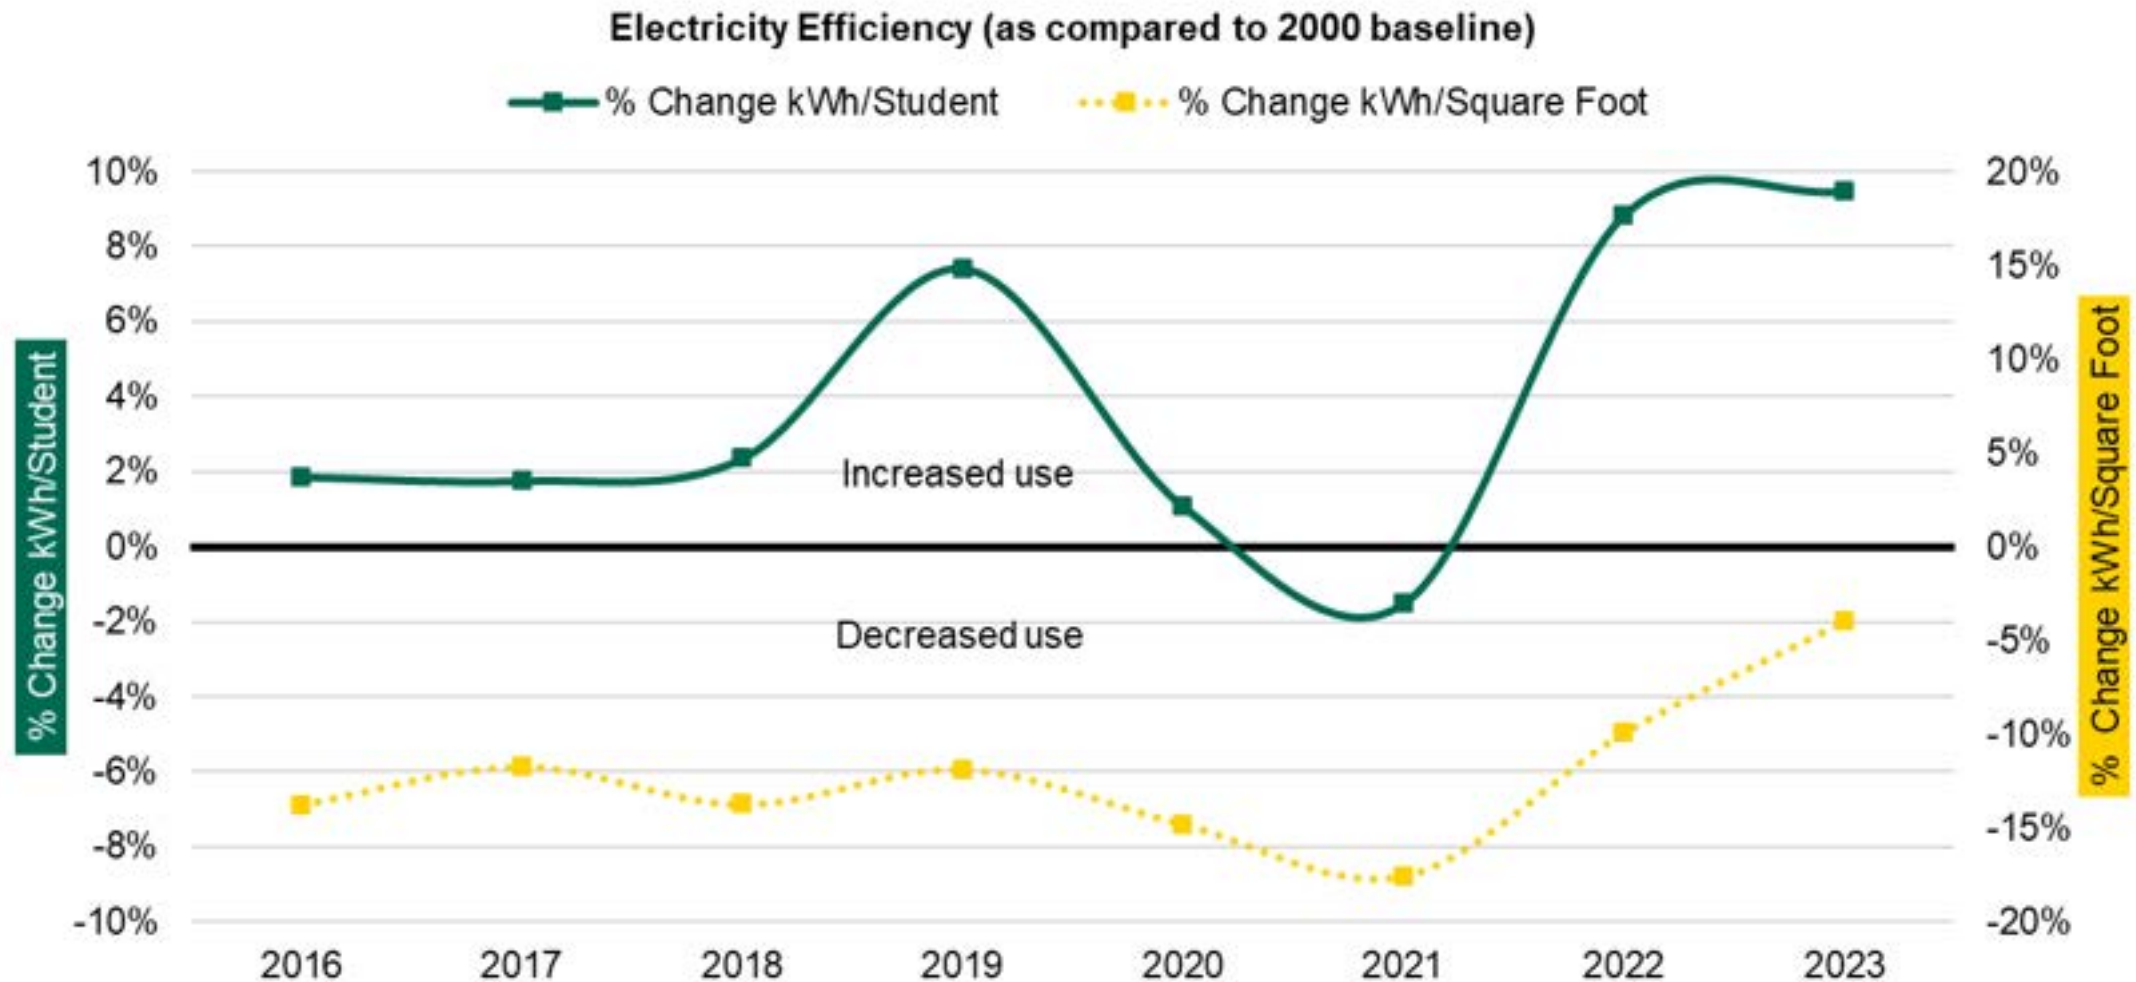

FY22: 46% (per student), 55% (per square foot)

Pathways: shift to strategic energy management and data-driven decision-making

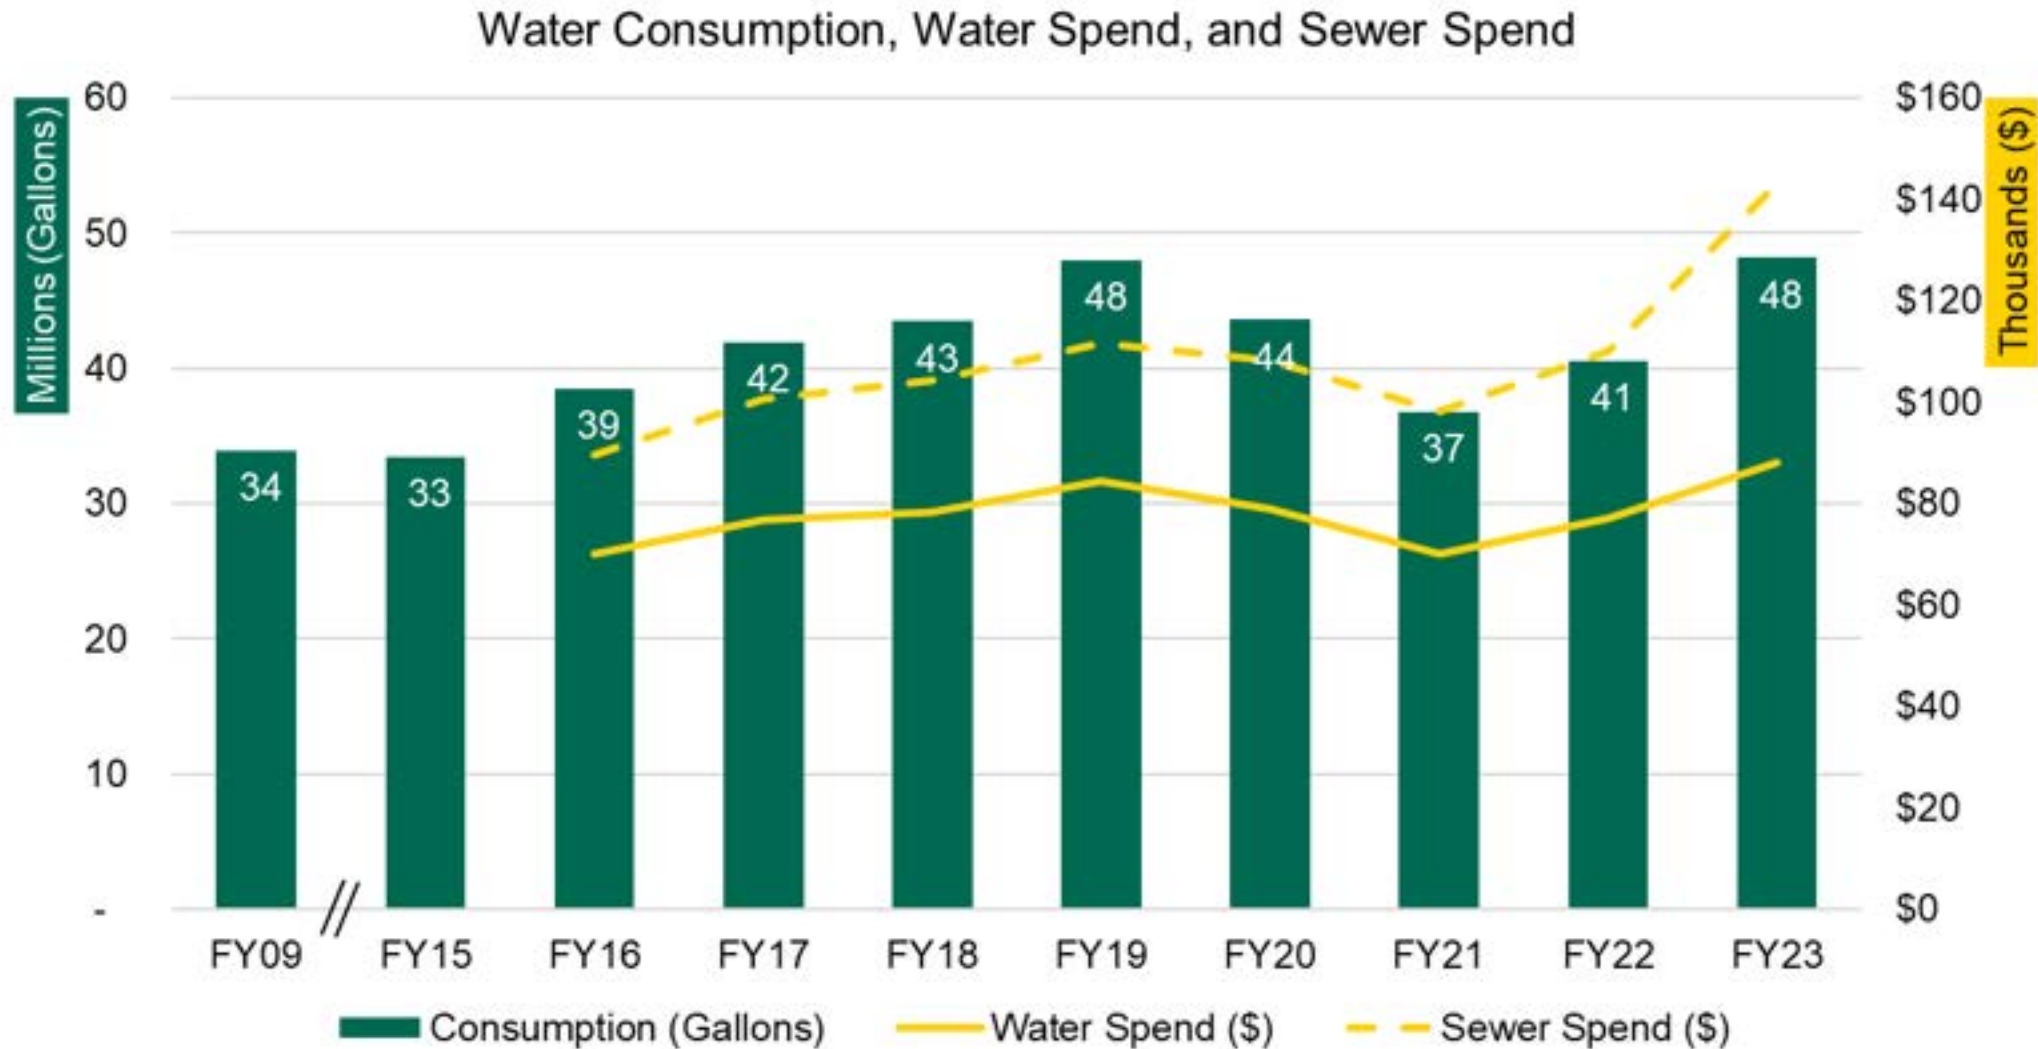

- building-level metering
- energy benchmarking
- energy use intensity metrics (EUI by building)

Energy Goal 5: Maintain electricity use per student and sf
FY23: +10% (per student), -4% (per square foot)

Water (not in the CSP)

Notable sewer rate increase in 2022

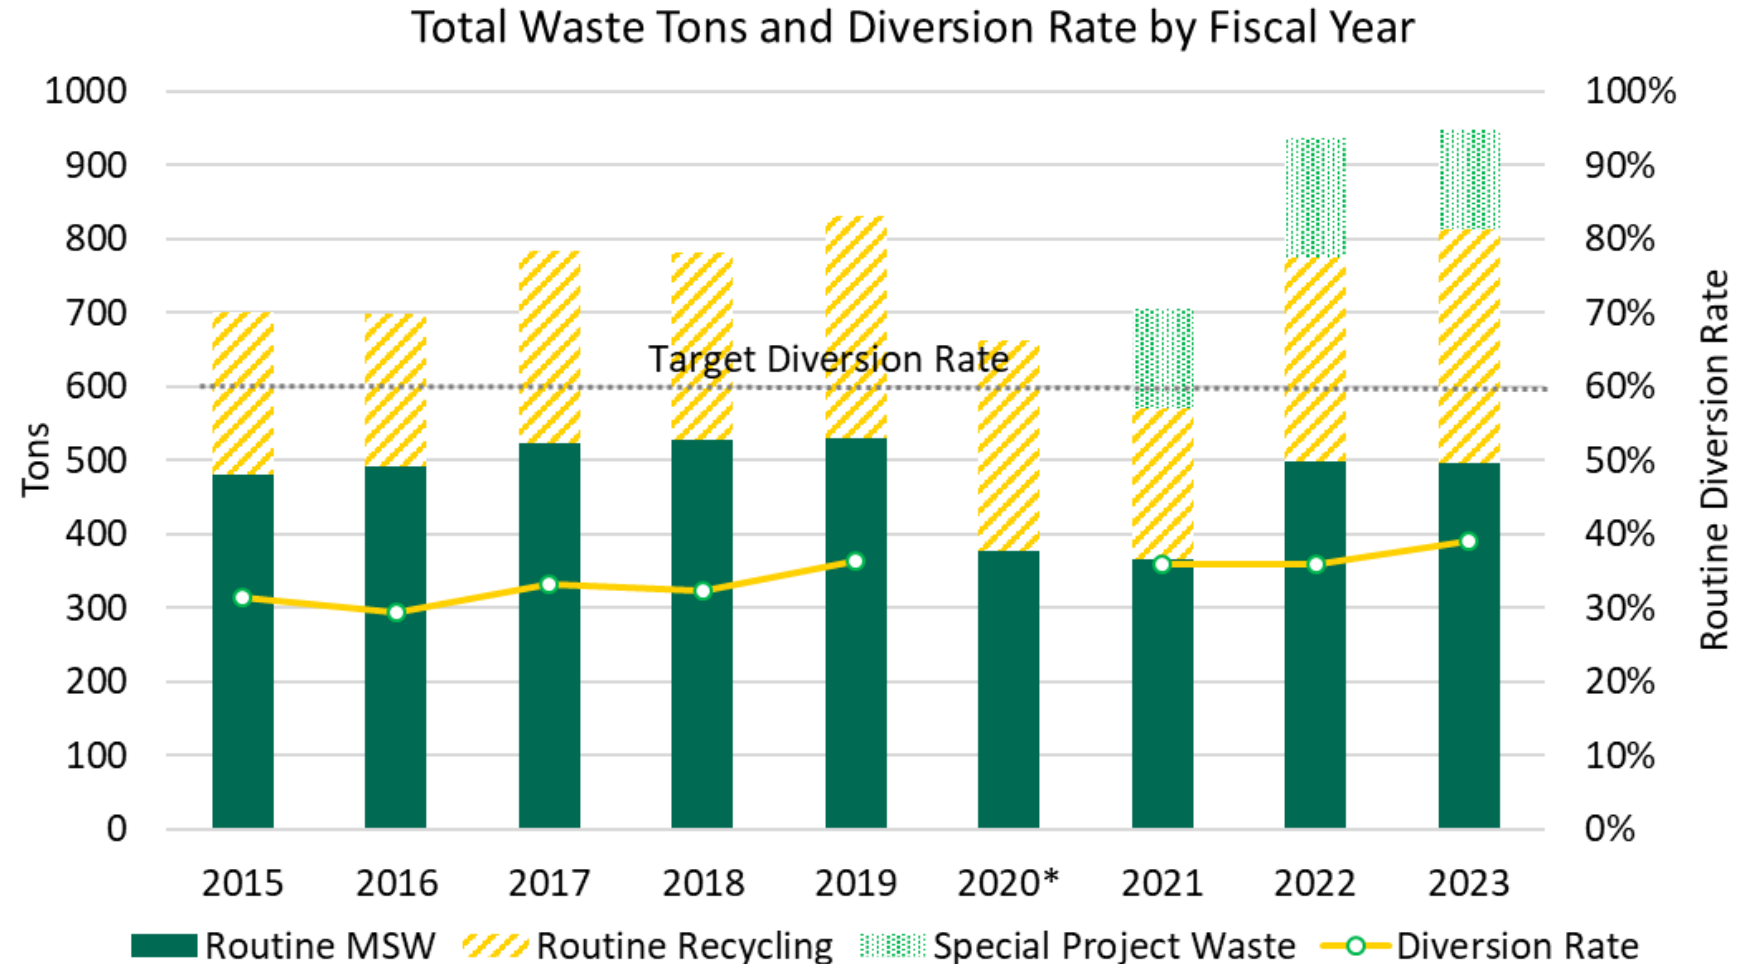

Waste Goal 1: 60% diversion rate (routine)

FY23: 39%

Special project waste
(aggregate only) data
tracking began 2021

Increase of 3% from
FY22 to FY23 is due to
post-consumer food
scraps collection

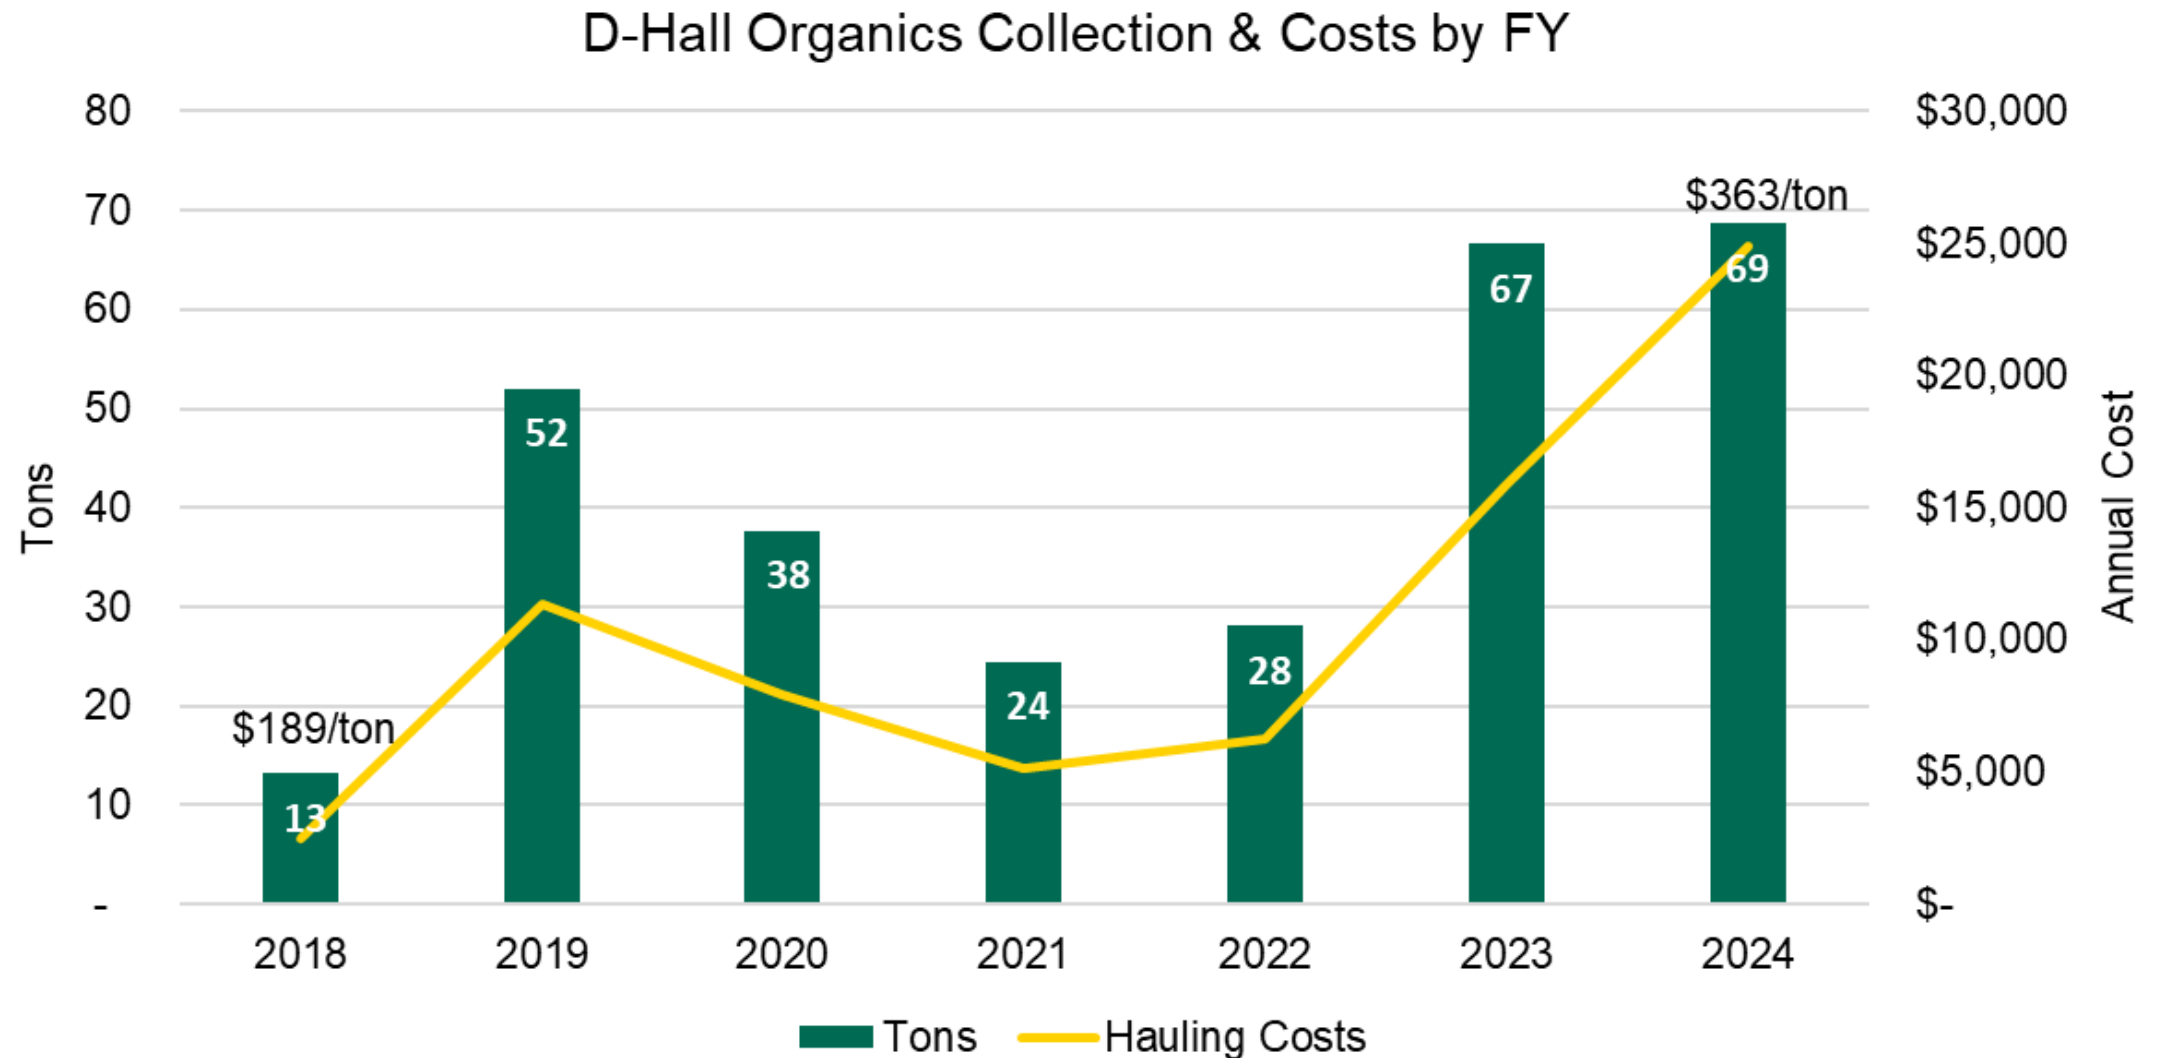

* MSW weights were unreported for three months of 2020, thus no diversion rate is presented.

Waste Goal 2: 50% diversion rate (special projects)

FY23: Minimal

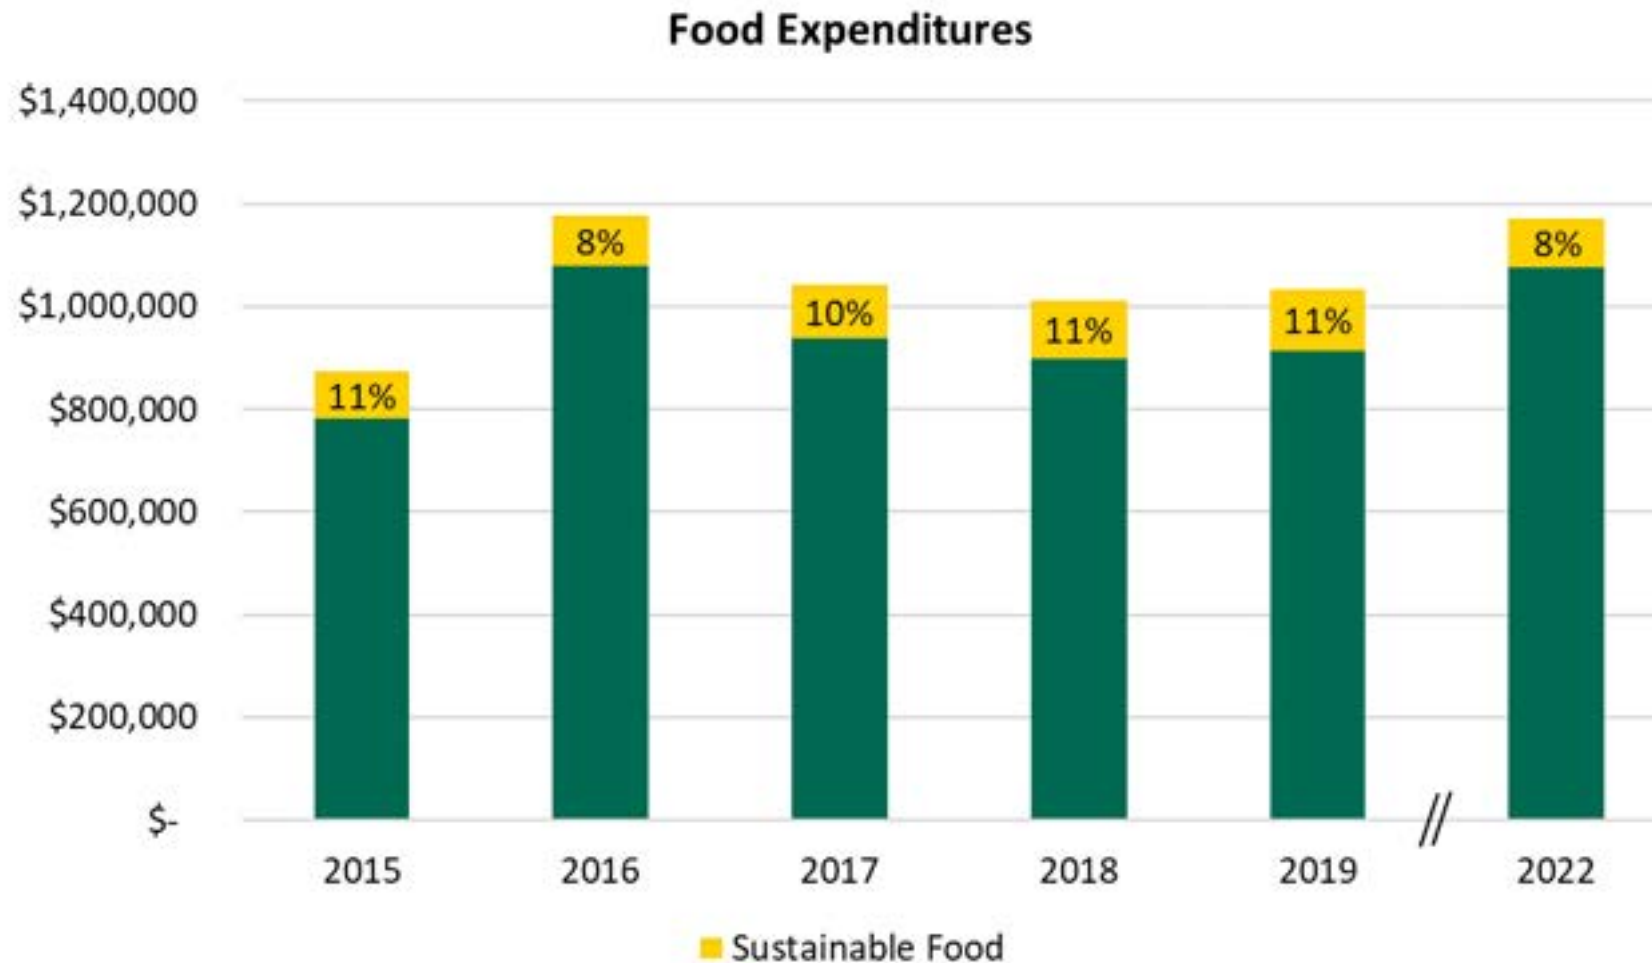

- All temporary dumpsters and the Facilities Construction and Demolition (C&D) dumpster on campus are landfilled and not tracked per project (tracked only in aggregate), except for LEED project builds
- Some outgoing waste streams/materials, like mattresses and furniture, are recycled or donated, as feasible

Waste: Organics collection

Food Goal: 25% sustainable food in Dining Services

FY22: 8%

Sustainable Food

Local

Fair-trade

Ecological

Humane

Conscientious

FY23: no assessment

FY24: in progress

- new methodology based on STARS
- local food will not count

Lands and Grounds Goal: Create a comprehensive lands management plan

FY23: Approved capital project for sustainable landscape planning

FY24: [Sustainable Landscape Plan](#)

Engagement Goal: Make sustainability an essential feature of Skidmore's identity and a value that is integrated into all aspects of the College

FY23: Various actions and initiatives

Major New Initiatives

- Gardenside sustainability living and learning community
- CDPHP *Cycle!* bike-share program
- Residential composting and departmental pilot
- SGA Green Grant development and approval
