

The savings power of Price Edge

To help lower medication costs, your pharmacy plan includes Optum Rx Price Edge.

Here is how Price Edge works for you:

You are already set up.

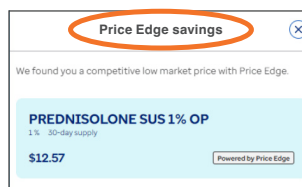

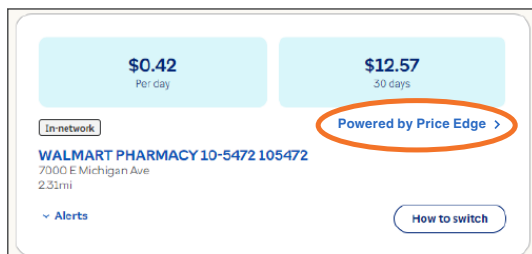

When you fill a prescription for generic medication at a network pharmacy, the Price Edge engine will look for competitive savings – even if the medication is not covered by your plan.

If Price Edge finds savings, you will automatically receive the lower price. It's that easy.

Look for “Powered by Price Edge” to find medication with added savings

To estimate costs before filling your prescription, download the Optum Rx app or sign in at **optumrx.com**. Then use the drug pricing tool to calculate cost.
