Present: Adrian Bautista, Amy Frappier, Heather Hurst, Lisa Jackson-Schebetta, Nick Junkerman, Robert ParkeHarrison, Kelly Sheppard, Emilka Jansen, Tess Molloy, Bernie Possidente (PC), Marketa Wolfe (ATC), Eileen Sperry (NTT negotiating committee), Joe Stankovich (IR).

Absent: Dorothy Mosby

Scribe: Robert ParkeHarrison

1. CEPP reviewed and approved September 25, 2023 meeting minutes.

2. Announcement: No CEPP meeting next week; Study Day.

3. Discussion of possible qSET reporting changes with invited guests: Bernie Possidente (PC), Marketa Wolfe (ATC), Eileen Sperry (NTT negotiating committee), Joe Stankovich (IR).

4. Joe Stankovich provided a detailed presentation about two key changes in qSET data reporting and a timeline.
   a. Scan Tron is moving to a cloud-based system for data reporting. This change will impact the college's qSET reports. The change to cloud reporting will not allow for two areas of data to be recorded on the college's qSET reports.

      i. Student question #6 will no longer have comparison data.

      ii. Profile question, will no longer have college average data.

   d. Timeline for qSET data changes:

      i. Oct. 9, meeting to evaluate the data reportage changes.

      ii. In late October, Joe will report back to CEPP with updates.

      iii. Nov. 1, meeting to determine if the college uses cloud vs. paper reporting.

5. Comments and questions by attendees:
      i. ATC uses a vast array of data and information for promotion cases. The change in qSET reports wouldn't make much of an impact on the evaluation process for promotions.
      ii. Does this recent change in cloud reporting signal an eventual change (on the horizon) to an all-digital, paperless evaluation process?
