

FACULTY MEETING
May 15, 2017

RESOLUTION

Be It Resolved,

That the faculty of Skidmore College takes seriously the need to link the college's institutional values and its investment philosophy and strategy. We appreciate the issue is complex and controversial, but we want to work with the President and the Board of Trustees to develop an investment policy that reflects the moral, fiscal, and political challenges of informed, responsible institutional citizenship. We urge the President to form a working group charged with developing a revised investment policy no later than December 31, 2017 for the consideration by the Board of Trustees, the faculty, and the Skidmore community.
