

Summer 2025 Campus Updates

Over the summer months, Facilities Services has been hard at work across campus completing a wide range of projects that began in May and in several cases, some will wrap up before the start of the Fall semester as other will continue in to the winter months. These efforts spanned across academic buildings, residential halls, and exterior campus spaces—improving infrastructure, enhancing accessibility, and supporting the College’s long-term maintenance and planning goals. A full list of completed projects, along with select photos, can be viewed below. In addition to these completed efforts, several projects remain in progress or are currently in the planning phase, with more scheduled over the next several months as we continue to invest in the stewardship and improvement of our campus environment
