${ }^{\gamma}$ 100-level Chemistry enrollment requires placement through the Chemistry Placement Diagnostic.

* Oral communication is also required for many Pharmacy programs. Some Pharmacy programs will accept the in the major oral communication requirement to fulfill, check with schools.
** Content covered are on the MCAT exam. A number of schools require four semesters of chemistry with lab plus biochemistry. CH 341 can be the fourth CH course \& CH 342 then serves as the biochemistry course. A few programs specify if biochemistry is a two-semester sequence, then both semesters need to be taken \& others recommend a full year.
^ MA 111 or placement in MA 113 or above is the co-requisite for PY 130 (PY 207) at Skidmore. MA 113 or placement above is the co-requisite for PY 140 (PY 208) at Skidmore.
\# EN 110 if thinking about a major or minor in English.
\$ Medical Terminology course may also be required.
Please Note: While there is a set of core courses that most schools typically require, there is also some variability across different programs regarding their required and recommended courses. This is only a guide; you should be sure to consult with your HPAC advisor regarding your selection of courses. You should always check the specific course requirements for each school you are going to apply to. It is your responsibility as the applicant to do so.
