Application for Receipt of Honors within the Neuroscience Major

Honors requirement in Neuroscience: *To be eligible for honors in Neuroscience, a student must meet the requisite grade point average* and complete two semesters worth of 300-level research related to neuroscience (summer research conducted either at Skidmore or at another institution will be considered.) Students must also file with the program, by withdrawal deadline of the spring semester of the senior year, an honors application. Within this application, students must briefly describe their research experiences and explain why these experiences should qualify them for honors in neuroscience.*

* To be considered for honors, the college requires a GPA of 3.500 or higher for work in the major, and a GPA of 3.000 or higher based on all work taken at Skidmore.

Name: _____

Cumulative GPA: _____

Neuroscience GPA: _____

Please describe the independent research experiences and/or internships you have had as an undergraduate that relate to neuroscience. These may have occurred at Skidmore or elsewhere. Describe your specific role in the research and mention the Skidmore faculty you have worked with, if any. Did you, or will you, present the research you conducted at a scientific conference? Are you, or will you be, an author on a submitted or published manuscript? *(Note: presentation and publication are not necessary criteria for receiving honors – we're just trying to get a sense of your involvement in the project.)*

Please type your answer on a separate sheet of paper and submit along with this form. Limit your answer to 1 page, single-spaced (12-pt font).

Submit to:
Jennifer Bonner, Director of the Neuroscience Program
Office: Dana 347
jbonner@skidmore.edu

Submission deadline: Withdrawal deadline for the spring semester. Check registrar's website for exact date.
