## 2. Use the drop down to toggle between evacuation locations one and two. Remember to click Save Changes whenever you alter something.

### Residence Life - Evacuation Locations

Test5 Res5 (999999905)

All Skidmore College students are required to submit a Personal Evacuation Plan to be used in case of an emergency (such as an extreme weather event) that requires the campus to be vacated. The plan must include the addresses of two different locations within a day's driving distance of Skidmore College, and how you will travel to each destination. The locations could include a home address, if applicable, or that of a friend or family member.

Below you will find a drop down menu listing "Evacuation Location 1" and "Evacuation Location 2." You will need to fill these out with both of your personal evacuation plan locations, one location under each choice on the drop down menu.

(When switching between Location 1 and Location 2, you will need to click on the "View" button. Failure to do so will result in you overwriting the prior entry.)

International Students: If you do not have a contact that meets the above requirements, please enter your home address. When you arrive to campus you can update your plan with a closer address.

Please contact the Office of Residential Life with any questions you may have.
